Invest in the Future: Support ARVO's New High School Program

ARVO's *Setting Your Sights* (SYS) program is focused on students ages 12–18 with a goal of inspiring a new generation of vision scientists by providing them with a variety of opportunities to learn about a career in research. Resources provided include:

- Networking with accomplished members of the vision community.
- Having SYS Advocates, vision scientists of all career levels, speak at schools and events.
- Providing educational toolkits and other engaging online learning materials.

BENEFITS IN GETTING INVOLVED

- Increase awareness of the eye and vision field within the next generation.
- Improve representation of members of under-represented groups in the vision and STEM field
- Engage with other enthusiastic researchers and create lifelong connections.
